

**INTERNATIONAL SOCIETY FOR MEDICAL
PUBLICATION PROFESSIONALS, INC. (ISMPP)**

RECERTIFICATION POLICY

A. Introduction.

The International Society for Medical Publication Professionals, Inc. (ISMPP) sponsors and administers a rigorous, examination-based, professional certification program – designated as the ISMPP Certification Program. Those individuals who have been granted the Certified Medical Publication Professional (CMPP) credential must demonstrate an ongoing professional commitment to the field of medical publication by satisfying the requirements of this Policy.

Effective as of October 1, 2020, this Policy updates and replaces the October 2018 Policy that establishes and explains the requirements that must be satisfied in order to maintain certification and provides related information, including the standards, guidelines, and procedures of the ISMPP Certification Program. Inquiries or questions concerning this Policy or the recertification process should be directed to the ISMPP Director of Credentialing (cmpp@ismpp.org).

B. Statement of Purposes.

The ISMPP Certification Program supports the ongoing professional development of ISMPP certificants and the maintenance of their CMPP certification. Among other purposes, the Certification Program is intended to: require reasonable and appropriate continuing educational and professional activities; enhance the ongoing professional development of certificants; encourage and recognize individualized learning opportunities; and provide a standardized, objective, and straightforward process for attaining and recording professional development activities.

C. Recertification Requirements.

Consistent with the terms of this Policy, certificants must satisfy the following requirements in order to maintain certification.

1. Recertification Eligibility Options. A certificant may choose one (1) of the following two (2) methods for recertification:
 - a. First Recertification Method/Continuing Education: Fulfill the requirements for continuing education (CE) credit hours as set forth in this Policy.

- Credit Requirements. Certificants seeking to recertify by CE credits must complete a minimum of thirty (30) CE credits during each three (3) year certification cycle, with a minimum of eight (8) credits to be earned in each calendar year, and no more than twelve (12) credits remaining to be earned in the final year, consistent with the requirements of this Policy. Unless otherwise permitted by this Policy, credits will be applied only for participation in activities during the current certification cycle.
- Qualification of Continuing Education Credits. With respect to qualifying structured learning activities, 1 credit is earned for each contact hour (50-minute session) related to the activity. With respect to other qualifying activities, such as academic coursework and publication development relevant to the medical publication profession, credit requests will be evaluated and determined by the ISMPP Certification Program on a case-by-case basis based on the [Guidelines for Approving CE Activities](#).

- OR -

- b. Second Recertification Method/CMPP Certification Examination: Achieve a passing score on the CMPP Examination during the calendar year of certification expiration (eg if certification expires December 2019, certificants must take the exam in March or September 2019 to remain certified). Certificants who elect to recertify by examination must submit a certification exam application, continue to meet eligibility requirements, submit application fees, and abide by applicable Certification Program policies.
2. Recertification Period. CMPP certification is valid for 3 years. Certification expires on December 31st of the 3rd year after the initial certification (3 years after the year of certification indicated on the certificant's CMPP digital badge). The recertification cycle begins on January 1st of the year immediately following the certification expiration date. Recertification will be valid for a 3-year period.
 3. Eligibility to Maintain CMPP Certification. In order to maintain active certification status in good standing, all certificants must satisfy the following requirements:
 - a. Code of Ethics Compliance. Comply with all Certification Program policies, including the Code of Ethics;
 - b. Active Employment. Demonstrate the equivalent of at least three (3) years of active employment or practice in the field of medical publications during the 3-year certification period. Active employment itself does not qualify as an activity for earning CE credits; and

- c. Recertification Processing Fee. Pay all recertification fees to the Certification Program for each recertification cycle by the required due date.

D. Qualifying Activities/Approved Methods for Earning Continuing Education (CE) Credits.

Unless otherwise permitted by this Policy, in order to be accepted and approved by the ISMPP Certification Program, all CE recertification activities must relate directly to a certificant's continued knowledge and skills in the field of medical publications. CMPPs are required to earn CE credits across all domains of the ISMPP-defined professional credential blueprint, as described in the Recertification Handbook. Failure to earn CE credits in any 1 of the blueprint domains will result in recertification ineligibility.

The types of activities by which CE credits may be earned are identified below.

1. Instructor-led Learning Activities, Including Seminars, Workshops, Courses, and Conferences.

You may earn credit for attending, whether face-to-face or online, seminars, workshops, courses, conferences, and other relevant educational activities offered by ISMPP or other educational program providers (ie, CBI, TIPPA, Q1 productions, etc) that have been reviewed and approved by the ISMPP Certification Program and listed in the [Approved CMPP™ Activities](#).

Documentation examples required for audit purposes (choose one or more from the following):

- Certificate or other acceptable verification of attendance
- Program or course description for live meetings (including webinars)
- Registration/payment receipt with the names of the activities attended
- Transcript, grade report, or verification form that indicates a passing grade in the course (if relevant)
- Screen capture of title slide with date/time indicated (webinars)
- Any other materials that explain the subject matter covered and the qualifications of the instructor(s) or content provider

2. Self-Paced Learning Activities.

Self-Paced Learning Programs are on-demand activities in which the instructor and student are separated by time and location, or where the student engages in the learning activity without an instructor.

To maintain a balance between live and on-demand learning, a maximum of 7 self-paced CE credits per year may be earned toward recertification.

- Self-study examples (non-inclusive):
 - Pre-recorded audio/video programs
 - Recorded webcasts
 - Self-paced online courses
 - Self-study using published material
 - Preparatory courses: online or print
- You may earn credit for participating in self-learning educational activities that have been reviewed and approved by the ISMPP Certification Program and listed in the [Approved CMPP™ Activities](#) list). The number of credit hours for each self-learning activity will be predetermined by the ISMPP Certification Program.

Documentation examples required for audit purposes (choose one or more from the following):

- Completion of a learning assessment following the activity
- Attestation of Completion following the activity, or Certificate or other acceptable verification of completion

- Credit may be earned for developing a self-study activity directly related to the field of medical publication. Credit will be granted for actual preparation time (up to 3 hours) and actual presentation time only (if applicable). The number of credit hours for this type of activity will be determined on a case-by-case basis by ISMPP Certification Program personnel

Documentation examples required for audit purposes (choose one or more from the following):

- Learning objectives or rationale for choosing topic
- Target audience
- Complete copy of the activity
- Personal record of the actual activity or presentation preparation time (if applicable)

- Other self-learning activities that ISMPP members believe may qualify for credits can be reviewed by the ISMPP Certification Program, pending discussion of the appropriate level of documentation. The potential for credit hours will be evaluated on a case-by-case basis.

3. Publications and Presentations.

- Credit may be earned for authoring a publication directly related to the field of medical publication. Credit will be granted for actual preparation time only. The number of credit hours for this type of activity will be determined on a case-by-case basis by ISMPP Certification Program personnel^a
- Credit may be earned for serving as a speaker or presenter during an industry meeting (eg CBI, TIPPA, Q1 productions, etc) directly related to the field of medical publications. Credit will be granted for actual preparation time (up to 3 hours) and actual presentation time only^b

Documentation examples required for audit purposes (choose one or more from the following):

- Complete copy of the publication or presentation
- Personal record of the actual publication or presentation preparation time
- For presentations only:
 - Documentation from the sponsor verifying the presentation activity, and time and content of the presentation (eg, a copy of the program agenda)

^a All requests will be considered on a case-by-case basis. Maximum allowable credits for writing a manuscript, book, or book chapter: lead/sole author = 6 credits; coauthor = 3 credits. The publication must directly support one of the domains for CMPP certification (ie, develop a publication plan, implement a publication plan, foster ethical and compliant behavior in publications, or monitor trends related to the medical publication profession).

^b Credit will be given for actual preparation time up to a maximum of 3 hours, plus actual presentation time, taking into consideration factors such as whether one or more presenters were involved and whether the presenter was a lecturer or moderator. Approval for credit hours should be based upon a preparation:presentation time ratio of a maximum of 2:1 no matter what the length of the presentation.

4. New Learning Activity Development. Credit may be earned for developing new and original learning activities, courses for internal company purposes, or professional attendance related to the field of medical publications. New program development activities for ISMPP or another organization are limited to the development of the content for an original course, seminar, workshop, or other formal learning program or activity. Credit will be granted for actual development and preparation time only.

Documentation examples required for audit purposes (choose one or more from the following):

- Original program proposal or needs assessment/learning objectives
- Syllabus or program agenda
- Document from the organizational sponsor verifying acceptance or approval of the new program (if applicable)
- Personal record of the actual preparation time
- Other supporting documents as may be required by ISMPP (eg, sample materials)

5. CMPP Examination Development Activities. Credit may be earned for participation in writing ISMPP Certification Program exam material or performing other activities associated with examination content development. Individuals involved in writing exam material or performing other activities directly related to the development of certification examination content or scoring are eligible to receive a maximum of 8 CE credits per year toward recertification; these credits can be accumulated for each year of participation during a certification period. ISMPP Certification Program personnel will assign the number of credits to the specific activity on the basis of the scope of work and time involved.

If involved in certification exam development, you may not take the exam for recertification (this restriction remains in effect for 6 years from the date of last exposure to examination content), but you are eligible to earn up to 8 credits per year for this activity. Subject Matter Experts who participate in item writing are encouraged to plan to recertify by CE credits.

Documentation examples required for audit purposes (choose one or more from the following):

- Personal record of the actual service time related to examination content development activities, including the dates of service, to be verified by ISMPP Certification Program personnel

6. Other. Activities that ISMPP members believe may qualify for credits can be reviewed by the CMPP Recertification Committee, pending discussion of the appropriate level of documentation. The CMPP Certification Board and CMPP Recertification Committee are open to other reasonable suggestions for credits. Simply submit your request for credit, and the potential for credit hours will be evaluated on a case-by-case basis.

Documentation examples required for audit purposes (choose one or more from the following):

Live or Face-to-face Activities

- Program or course description and learning objectives (if available)
- Program content
- Certificate of program attendance
- Any other materials that explain the subject matter covered and the qualifications of the instructor(s) or content provider

Online activities:

- Completion of a learning assessment following the activity
- Attestation of Completion following the activity, or Certificate or other acceptable verification of completion

E. General Recertification Guidelines.

1. CMPP Recertification Credit Tracker. Certificants are responsible for entering recertification CE activities in the credit tracker on a yearly basis, by or before the end of each certification year within a 3-year certification period. Certificants are not permitted to track their CE activities in their own format to be considered for recertification, Certificants must complete all required information concerning each recertification activity, and must identify the ISMPP-defined professional credential blueprint domain to which the activity applies. The process for the tracking of CE credits is described in the Recertification Handbook and Credit Tracker Instruction Guide.

2. Granting Credit. All recertification activities submitted for credit are subject to review and approval by the ISMPP Recertification Committee and Director, Credentialing. In order to assist in the acceptance of a recertification activity, certificants are encouraged to contact the ISMPP Certification Program prior to participating in an activity to gain information as to whether credit may be granted for completion of such activity. Credits can be earned only once for participation in activities with identical content. In all cases, credit is granted only after the educational or professional activity has been completed and documented. Credit is not granted for time spent at social functions or for breaks.
3. Credit Denial. The ISMPP Certification Program reserves the sole and exclusive right to evaluate all activities and programs on an individual basis, and at its discretion, to deny credits for those activities that fail to meet the terms of this Policy, the Recertification Handbook, and other ISMPP requirements. In its evaluation, the ISMPP Certification Program will consider the number of credits (if any) offered for a program or activity by other providers. However, the ISMPP Certification Program reserves the sole and exclusive right to make all final determinations concerning the number of credits granted for each activity. The certificant will be notified when credits are reduced or denied, including a statement indicating the basis for such action.
4. Maintenance of Personal Recertification Records. As explained in this Policy, each category of qualifying recertification activities indicates the information and materials that must be collected and maintained in order to receive credit. Certificants must maintain the applicable records and documentation related to each reported recertification activity for at least twelve (12) months after the current recertification cycle has ended. Such records should be uploaded into the CE Credit Tracker or stored in a safe and secure manner. The ISMPP Certification Program reserves the right to request additional information or clarification concerning a specific activity or program prior to final acceptance and granting of credit, or at a future time.
5. Recertification Application. A Recertification Application must be submitted to the ISMPP Certification Program no later than ninety (90) days prior to the end of the current certification cycle, ie, September 30th of the year of certification expiration. Upon receipt of a completed Recertification Application and related fees by the ISMPP Certification Program, and satisfactory completion of the 30 CE credit requirement for the current recertification cycle, the expiration date on a certificant's digital badge will be updated.
6. Remaining Credits Upon Submission of Recertification Application. Certificants must not have any more than 5 CE credits for those who are currently in the 5-year cycle and 3 CE credits for the 3-year cycle left to be completed upon submission of his/her Recertification Application. In the event a certificant has not completed his/her CE credit requirement by the September 30th deadline, he/she must submit a written, detailed plan explaining how he/she plans to complete the remaining credits by December 31st. A revised Recertification Application form must be submitted to the Certification Program no later than January 31st of the following year, identifying all remaining CE credit activities completed, with required documentation. If any of the remaining CE credit activities are deemed ineligible for credit by the Certification Program, the certificant must complete all remaining credits no later than April 30th of the following year.

7. Transfer of Excess Credits. Up to 5 excess credits for those who are currently in the 5-year cycle and 3 excess credits for the 3-year cycle earned during the final year of the current certification cycle may be applied to the next certification cycle. If excess credits are transferred for credit towards the next certification cycle, certificants must maintain all applicable documentation related to such activities, consistent with the terms of this Policy.

F. Mandatory Recertification Audits.

Each year, the ISMPP Certification Program will select approximately ten percent (10%) of certificants randomly for a recertification audit, in order to verify compliance with this Policy. Notification of selection for mandatory audit will be sent after receipt of the Recertification Application. Certificants selected for audit must comply with all audit instructions and requirements and must have uploaded or retained all applicable documentation supporting all reported recertification activities for the current or most recent certification cycle. Failure to satisfy or comply with audit requirements will result in suspension or revocation of certification, consistent with the terms of this Policy.

G. Failure to Satisfy Recertification Requirements.

Certificants who fail to satisfy the recertification requirements prior to the conclusion of the current certification cycle will become inactive and placed on an inactive list of certificants, and the following terms apply, unless otherwise provided by this Policy.

1. Suspension. Following the issuance of a suspension notice, the certificant will be placed on immediate suspension status for up to 1 year or until such time as the certificant fulfills the relevant recertification requirements. In the event of certification suspension, the applicable dates for the following certification cycle remain effective and are not altered, i.e., the suspension period will be concurrent with the first year in the current certification cycle. Upon satisfactory completion of all relevant recertification requirements, the certificant will be returned to active certification status.
2. Revocation. Failure to satisfy the relevant requirements within 1 year following the expiration of a certification cycle (during the suspension period) will result in revocation and termination of certification. Unless otherwise directed by the ISMPP Certification Board or other authorized ISMPP Certification Program representative, a revoked or

terminated certification may not be reinstated. In order to obtain certified status, a former certificant must reapply for certification and satisfy all requirements of the initial CMPP certification process, including passing the CMPP certification examination.

3. Prohibited Use of Credential. A certificant whose certification has been suspended or revoked may not represent himself or herself as an active certificant or as certified by ISMPP, and may not use the CMPP credentials or certification marks until such time as he or she receives notice from the ISMPP Certification Program that: the relevant recertification requirements have been satisfied; or his or her active certification status has been reinstated, consistent with the terms of this Policy.

H. Voluntary, Optional Changes in Certification Status.

1. Relinquishment of the Credential. A certificant in good standing may voluntarily relinquish his or her certification by submitting a written request to the ISMPP Certification Program, indicating acceptance of, and agreement to, the following terms. Such certificants will be removed from active certificant records.
 - a. Prohibited Use of the Credential. A certificant who voluntarily relinquishes his or her certification may not represent himself or herself as an active certificant or as certified by ISMPP and may not use the CMPP credentials or certification marks until such time that he or she: satisfies the relevant recertification requirements; or has his or her active certification reinstated.
 - b. Reinstatement to Active Certification Status. If reinstatement to active certification status is requested prior to the time the active certification would have expired; ie, within the certification expiration date that was in effect at the time the certification was relinquished, the former certificant may request that active certification status be reinstated by paying all applicable fees at the time of reinstatement. A former certificant who wishes to reactivate certification status within 1 year beyond the expiration date of certification must satisfy the applicable recertification requirements and provide all applicable documentation. A certificant who has relinquished his or her certification for more than 1 year beyond the expiration date of active certification must reapply for certification and satisfy all requirements of the initial certification process, including passing the CMPP certification examination.
